Ayushman Bharadwaj

UX/UI Designer | Interaction Designer

Dehradun, India | ayushman15899@gmail.com
Portfolio: ayushman-bharadwaj.vercel.app | LinkedIn: linkedin.com/in/ayushman-bharadwaj-660759289

SUMMARY

Interaction designer finishing an M.Des at UPES, with a B.Tech in Computer Science and a year in security engineering at EY. I take products from user research through wireframes and prototypes to shipped front-end code, and I have launched live websites for freelance clients. Looking for UX/UI roles where research, design and engineering meet.

EXPERIENCE

Freelance UX/UI Designer and Developer Aug 2023 – Present
Self-employed, Remote

- Designed and built an online ordering website for HoyChoy Café (hoychoycafe.com) with PhonePe payments, after mapping the order flow and finding that time was lost relaying orders between chat, staff and customer.
- Designed an admin panel so the café owner manages orders, menu, prices, hours and photos without a developer; fixed payment and data security issues before handover.
- Designed and built himanshugarg.in for a health coach: structured 108 conditions across 12 categories into a navigation that leads from symptom to root cause; handed over with maintenance documentation.
- Designed website wireframes and Framer builds for an architecture firm and a growth studio.

Manager, Product and Websites Jun 2024 – Jul 2025
Dopamine Ventures

- Owned the UX of a wellness CRM from early concept: user flows, IA and interaction design.
- Ran user research and built personas, and used them to decide which features went into the first release.
- Designed the scheduling system end to end, covering availability, conflicts, manual bookings and edge cases.
- Wrote PRDs from the research and worked with developers through build and design QA to ship.

Cybersecurity Analyst Jul 2022 – Aug 2023
Ernst & Young (EY)

- Tested client web and mobile apps (SAST, DAST, VAPT, API testing) and reported findings to product teams.
- Worked through failure states and edge cases in real products, a habit I now apply when designing user flows.

PROJECTS

Signal: Delhi Metro boarding concept 2026
UX research, interaction design, prototyping

- Interviewed Delhi Metro commuters and synthesised findings in FigJam, which shifted the focus to daily riders.
- Found that riders change routes and even move house to avoid crowded interchanges, and narrowed the problem to one decision: which coach and which station to board from.
- Reframed the idea from a standalone app to a feature inside DMRC's app, using the coach-occupancy sensors DMRC is already trialling; designed the screens and a prototype.

Kizuku: mobile app for future anxiety 2026
Product design, design system, React Native

- Designed a short daily flow for future anxiety: write one worry, choose one small action, then reflect.
- Built a Figma design system: colour tokens, type pairing and a theme for each of three user types.
- Built a working prototype in React Native (Expo); reviewed with faculty, user testing planned.

SKILLS

Design: User Experience (UX) Design, User Interface (UI) Design, Interaction Design, User Research, Usability Testing, Personas, Journey Mapping, Information Architecture, Wireframing, Prototyping, Design Systems, Accessibility

Tools: Figma, FigJam, Framer, Adobe Creative Suite, Miro, Notion, Jira

Development: HTML, CSS, JavaScript, TypeScript, React, Next.js, React Native, Tailwind CSS, Supabase, Git, Vercel

EDUCATION

M.Des, Interaction Design, University of Petroleum and Energy Studies, Dehradun Aug 2025 – 2027

B.Tech, Computer Science and Engineering, Sikkim Manipal Institute of Technology, CGPA 8.23 2018 – 2022
